Protect What Matters Most

- **8 Channel Smart HD Video Security System with 1 TB HDD and 4 x 1080p HD Cameras**

Modern High Definition technology is amazing for movies and sports, and now, it's even better for video security! The latest in cutting edge HD technology has greatly impacted the video surveillance market. Customers continue to demand more enhanced image quality for use in applications where showcasing movement and identifying objects are vital. Nothing is more precious than your family, your home, your business and your peace of mind. Clearer HD images and video greatly enhance the recognition of intricate details such as license plate numbers and distinct facial features. With the introduction of HD resolution in security cameras, clearer and sharper images have become the new standard!

- **Secure your Home/Business in HD**

Searching for a High Definition video security system that's both cost effective AND simple to set up? Look no further than Night Owl's brand new AHD Series. These products deliver image quality that is far superior to traditional analog systems.

- **Seamlessly Upgrade Outdated Security Systems**

Looking to upgrade from an older analog system? No need to rewire your home! With Night Owl's AHD Series, each system can be integrated with your existing coaxial cabling! It's that simple. Once you're up and running, install our free mobile app and begin viewing your home and/or business right from your phone.

*Minimum cable requirement is 24 AWG.

- **Smart Device Integration**

Enjoy the quick, easy and secure remote setup of your system with our free Night Owl HD app, which utilizes Owl Scan™. Once cameras are installed and functioning, customers are connected in three simple steps:

- Download the FREE "Night Owl HD" App
- Scan the QR Code using Owl Scan™
- Start Viewing your property

Private Access to Video

User video is never transmitted to our server nor any third party server, EVER. Once setup is complete, your cameras and smartphone operate as peer-to-peer devices.

Motion-Activated Recording with Push Notifications

Don't want to spend your time monitoring an empty room? No problem. Night Owl Security's motion detection allows the system to record only when necessary. You can even set the motion detection area of each individual camera to monitor certain areas. Receive a push notification directly to your Smart Device when motion is detected in the selected zone.

Multiple Viewing Options with Digital Zoom

Night Owl HD allows the user to create “favorite” screens and view multiple cameras from unlimited locations. Then, digitally zoom into any image during video playback directly from a Smart Device. For example, a business owner can view cash register activity in all four of their sites on one screen. Night Owl enables you to monitor your home and business simultaneously, without switching apps or devices. Talk about being connected!

No computer needed for Playback

Night Owl HD allows you to easily playback video from multiple cameras in one screen on your smart device. Plus, you have the ability to play back up to 6 months of video footage without ever having to touch the DVR again. Our intuitive smart app can even store the video or picture directly onto your smart device.

HDMI Connection to your TV or Monitor

The DVR easily connects to multiple TV's or monitors with the convenience of two video outputs for instant viewing. The DVR is equipped with 1 VGA and 1 HDMI video output, creating broader coverage per square foot for homes and small businesses and includes a 6 foot HDMI cable.

1TB pre-installed Security HDD

If your needs change, you can always expand the system up to a 4TB internal SATA HDD. The hard drive was specifically designed for DVRs. It provides faster read/write times and reliable recording of your video security footage.

Indoor/Outdoor Night Vision HD Cameras

The AHD 1080p cameras are equipped for night vision up to 100 feet, and auto IR cut filter sensors that produce a clear and crisp image day or night. All cameras are designed for use both indoor and outdoor, rain or shine, for an extra layer of safety and deterrence. If there's something out of place at your home or business, it won't escape the watchful eyes of this Night Owl Security System. That's peace of mind, all the time.

Wide Viewing Angle

These 1080p HD bullet cameras feature a 100° field of view over the standard 42° view of most cameras, with picture perfect 16:9 wide-angle viewing. This expanded field of view offers a better picture while monitoring larger and distant areas with ease and precision.

Vandal Proof Camera Mounts

Night Owl AHD 1080p cameras come equipped with a vandal-proof mounting bracket. The cable runs directly through the center of the bracket into the wall or ceiling, preventing exposure that could attract potential intruders.
